

D&D BOOTH SERIES 100

STANDARD BOOTH CONSTRUCTION

D&D'S STANDARD VINYL AND UPHOLSTERY FABRICS ARE FORMULATED FOR MAXIMUM STAIN RESISTANCE AND WEARABILITY.

D&D'S REMOVABLE SEATS ARE CONSTRUCTED WITH TWO LAYERS OF HIGH-RESILIANCE (HR) LATEX POLYURETHANE FOAM. HR FOAM HAS A CELL STRUCTURE DIFFERENT FROM CONVENTIONAL FOAM PRODUCTS. D&D ONLY USES ULTRA HIGH-DENSITY FOAM SPECIFICALLY MANUFACTURED FOR USE IN SEATING AND MATTRESS PRODUCTS.

ALL BOOTHS ARE AVAILABLE WITH A LAMINATE CRUMB RAIL AT NO EXTRA CHARGE.

D&D USES WATER-RESISTANT, ULTRA HEAVY-DUTY ORIENTED STRAND BOARD (OSB) AS THE SEAT DECK. THIS IS SAME PRODUCT USED AS A ROOFING LAYER IN MANY NEWLY-CONSTRUCTED HOMES. THE USE OF A SEATING DECK HERE ENSURES OUR SEATS WILL NEVER 'BOTTOM OUT' AND WILL HAVE GOOD SUPPORT FOR THE LIFE OF THE SEAT.

D&D'S BOOTH BASES ARE CONSTRUCTED OF EXTERIOR-GRADE PLYWOOD USING WATER-PROOF GLUES AND HEAVY-DUTY FASTENERS. D&D'S BOOTH FRAMES ARE BUILT TO RESIST THE HARD WEAR OF A COMMERCIAL ENVIRONMENT.

D&D'S BOOTHS ARE AVAILABLE WITH A VARIETY OF TRIM, INCLUDING:

- HARDWOOD (ANY SPECIES) FINISHED ANY COLOR
- PLASTIC LAMINATE
- UPHOLSTERY
